# Regenerative Medicine and Human Genetic Modification (Paperback)

By Ed Gaskin

Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. First Genetically Modified Babies Born, read the news headline. While not technically examples of genetically modified humans, the fact is when the babies were genetically fingerprinted they had the genes from two mothers and one father, which would alarm most people. One of the scientists involved said this is child s play, a mere tweaking of the reproductive process. Imagine before you Tinker Toys or Legos of all different sizes, shapes and colors. Imagine those pieces are actually genes from insects, plants, animals and people that can be used interchangeably to provide humans characteristics only comic book superheroes possess. Scientists have already taken the gene that provides the jellyfish its green color and inserted it into the DNA of a white rabbit to create a green rabbit. Scientists have taken the genes that enable spiders to make webbing and combined them with a goat s DNA as a way for the goat to make spider silk, a strong new fiber. We can do similar things with human DNA. Genomics provides us the equivalent of the Application Program...
