Book Condition: New. Publisher/Verlag: Springer, Berlin | This is a personal but authoritative guide written by two experienced clinicians for those practitioners and hospital specialists faced occasionally with a neurological problem in an elderly patient. With increasing availability and reliance upon non-invasive imaging techniques, the need for these skills in large areas of neurological practice has diminished. But perhaps more importantly, the classical clinical methods in neurology were developed when the elderly population was much smaller and when the specialty of geriatrics did not exist. As a result,...
