Fluid-structure Interaction (FSI) is a scientific discipline spanning physics and engineering, which deals with the study of the interaction of solid or flexible structures with internal or surrounding fluid flows. FSI problems are encountered in many different branches of science and engineering, such as aerodynamics, hydrodynamics, and hemodynamics, covering problems across a wide range of time and space scales. Containing papers presented at the Seventh International Conference on the topic, this book covers new developments in fluid structure interaction problems. First organised in 2001, the conference includes contributions from international experts on a variety of topics, including: Hydrodynamics; Aeroelasticity; Computational Methods; Analytical Studies; Vortex Induced Vibrations; Experimental Studies and Validation; Industrial Applications.
