Brand New Book ***** Print on Demand *****.Excerpt from How Germany Makes War General Von Bernhardi s book On War of Today is one of the most important military works that have appeared in recent years. It is of special interest at the present moment as an exposition of the ideas underlying the German plans for the war with the Allies, and the methods on which the German staff rely in their operations in the field. The book is an attempt to show how war can be successfully conducted with the enormous masses of men now thrown into a conflict between nations, the armies of millions that put the whole fighting power of a people into the battle line. General von Bernhardi insists that while certain fundamental principles of war must always hold good, their practical application has to be considerably modified now that these armies of masses are brought into action, and have to employ weapons and appliances more efficient than any which were used in earlier wars. The book was written for experts, and all serious students of war should read the complete translation of the work issued last year by Mr. Hugh Rees. But many readers will be glad to have the condensed version of General Bernhardis treatise contained in the following pages. Some of the more technical details of the original work have been omitted; but nothing has been thus set aside which affects the writers main argument. So, too, a choice has been made among the numerous examples from military history by which he illustrates it.
