Wanderung Nach Dem Orient Im Jahre 1838

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. Original publisher: Champaign, IL : US Army Corps of Engineers, Construction Engineering Research Laboratory ; Springfield, VA : National Technical Information Service, distributor, 1999 OCLC Number: ocm44788326 Subject: Military bases -- Environmental aspects -- United States. Excerpt: . . . CERL TR 99 64 15 Schwertmann 1981). R factor values can also be calculated directly from local precipitation data (Renard et al. 1997). Published isoerodent maps are the pri-mary source of R factor values for the ATTACC model. The soil-erodibility (K) factor is the rate of soil loss per rainfall erosion index unit under standardized conditions. K factor values can be calculated from soil sam-ples using a soil-erodibility nomograph (Wischmeier, Johnson, and Cross 1971; Wischmeier and Smith 1978; Renard et al. 1997) and algebraic approximations of the nomograph (Renard et al 1997). When K factor values are estimated from soil samples, they are extrapolated across the installation using soil maps, re-motely sensed imagery, plot allocation strata, or other data sources as available. K factor values are also available with most published soil surveys from the U. S....
